"For as the sun cannot be divided into light, heat, and color, the whole of God and the whole of man cannot be separated under the white mantle of the host; for even if the host should be divided into a million particles (if it were possible) in each particle should I be present, whole God and whole Man. When you break a mirror the reflection to be seen in it is not broken; similarly, when the host is divided God and man are not divided, but remain in each particle."
